

Training Program Overview

Why You Should Attend

Are you a new customer of CareFusion NeuroCare? Perhaps you're familiar with your instrument, through years of experience, but need updating on the latest software features. Maybe the original system operator received formal training and subsequently trained others, resulting in a dilution of skills. Perhaps you've added a system upgrade and would like to develop new easy-to-follow methods, through the use of automated procedures. Or maybe you're interested in performing new applications on your instrument, but you aren't sure how to start.

If you fit any of these profiles, CareFusion NeuroCare offers a course designed especially for you. You'll have an opportunity to develop the skills you need to do your job effectively and productively and maximize the value of your CareFusion NeuroCare instrument. We also understand that your service requirements are unique. Therefore, service courses are offered for your engineering personnel.

The CareFusion NeuroCare Faculty

CareFusion NeuroCare's instructors come from both theoretical and technical backgrounds. They are experts in applications, instruction methods, and the use of CareFusion NeuroCare equipment. The faculty has used CareFusion NeuroCare instruments in real-world settings, solving practical problems. They provide focused instruction, geared to individual levels of expertise. Whenever possible, class agendas provide time for close interaction between you and the instructor, to address questions related to your particular applications.

Class Overview

CareFusion NeuroCare's instructors will explain the principles behind your instrument and how to get the most out of it. Extensive hands-on labs and practicum allow you to apply lecture material. You'll share your experience with other students and learn from their backgrounds and insight. In addition, your instructor can answer questions related to your particular requirements and applications. It's an opportunity to escape your day-to-day pressures and interruptions; allowing you to focus on an enjoyable, rewarding, learning experience.

Continuing Medical Education (CME) credits will be granted to each attendee who successfully completes a vascular course. These 'Category A' CME credits are sponsored by the Society of Vascular Ultrasound. They are the official ongoing medical education credits required for the Registered Vascular Technology re-accreditation credential for the American Registered Diagnostic Medical Sonographers (ARDMS), the American Registry of Radiologic Technologist (ARRT) and the Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL) for accreditation. 19 CME credits will be issued upon successful completion of the Introduction to TCD Ultrasound course. 16 CME credits will be issued upon successful completion of the Introduction to Peripheral Vascular Testing and Instrumentation course.

Course Prerequisites

Prerequisites listed in the course description outline the knowledge or background a student should have in order to receive maximum benefit from the course. Prerequisites may be met by any combination of training and experience. While students who do not meet prerequisites may be admitted, they will find the material extremely challenging and rapidly paced. If you are unsure whether you meet course prerequisites, please contact the Training Coordinator and ask to speak with the instructor.

Basic computer skills are necessary for all courses. This entails basic skills such as: using a mouse (right click/left click, click and drag); basic typing skills (knowing the layout of a keyboard); knowledge of Microsoft Word (file open/close/edit, save/save as, delete).

Training Schedule

The current training schedule, for CareFusion NeuroCare's operation and maintenance courses, is posted on CareFusion web site <http://www.carefusion.com/customer-support/training/index.aspx>.

Training Packages

Middleton-based training courses include tuition, course materials, hotel room and lunch each day.

Course Locations

Courses are held at our home office in Middleton, Wisconsin. For courses at your facility, please see our section on Customized Workflow Onsite Training. To find a schedule of the courses, please log on to the website <http://www.carefusion.com/customer-support/training/index.aspx>. Classes start at 9:00 a.m. and conclude at 4:30 p.m. daily. Most classes dismiss at 3:00 on the last day. Start and end times will be provided by the Training Coordinator upon registration.

Lodging Arrangements

Hotel accommodations will be reserved for you at the Residence Inn located at 8400 Market Street, Middleton, Wisconsin, 53562. You can view the property on the web at <http://www.marriott.com/hotels/travel/msnwm-residence-inn-madison-west-middleton/> or give them a call at (608) 662-1100 for more information on the hotel. There is no shuttle service provided to and from the airport. Directions from the airport to the hotel are listed below or you can utilize Madison Taxi. The estimated fare is \$33 one way.

Turn right on Darwin Rd. Slight right onto WI-113N/Northport Dr. Left on CR-M. Right on CR-K. Left on US-12E. Take Greenway Blvd. exit (252). Turn right onto Greenway Blvd. Turn right on Deming Way. Turn left on Market Street.

Registration Information

To register for a course, please complete the CareFusion NeuroCare registration form located on the website. For current pricing, contact CareFusion NeuroCare's Training Coordinator at 800-356-0007. When calling, please specify the course you are interested in attending. CareFusion NeuroCare reserves the right to cancel a course due to the lack of minimum enrollment. Three to four weeks prior to the class, a confirmation letter will be faxed to you, confirming that the class will be held. The letter will give you information about making travel arrangements. Do not make reservations prior to receiving your confirmation letter.

Payment

If training was purchased with your CareFusion NeuroCare equipment, please provide the CareFusion NeuroCare order number on your registration form. If you are purchasing a training package directly from CareFusion NeuroCare, you will need to provide a purchase order or credit card number. You will receive an invoice for course fees after you register.

Cancellation or Substitution

Please contact CareFusion NeuroCare as soon as you know you must cancel your enrollment. Cancellations received up to two weeks (10 working business days) before the course starts are fully refundable. Cancellations received after these times are non-refundable. Student substitutions are accepted up to two weeks (10 working business days) before the course starts. The substitute should meet all course prerequisites.

Upon Completion

You'll leave CareFusion NeuroCare's training with new ideas and knowledge that you can put to use immediately. You'll be exposed to the finer points of your instrument and how to apply them in new situations. Our goal is to help you gain more confidence in obtaining and interpreting results. The concepts, tools, and techniques you will learn can make it easier to use your CareFusion NeuroCare instrument to its fullest capabilities. Your increased understanding of CareFusion NeuroCare's instruments will make you more productive and effective in your job.

Customized Workflow Training Onsite

Because each facility has a different workflow pattern, general instructional classes for system operation may not be enough. If you have a large group of people that require training or you prefer to have the training customized to your business needs, you may prefer to hold classes at your facility. CareFusion NeuroCare offers Customized Workflow Training at your location. CareFusion Training Consultants are experienced in the neurology disciplines and have extensive experience with the instruments. These skilled individuals will come to your facility, teach system operation, and customize the training course to show how the instrument can be used efficiently for your facility's workflow

CareFusion NeuroCare will provide all standard class material and will train using your instruments. You will need to provide a suitable training facility, appropriate supplies, and audiovisual equipment, if required. Please contact CareFusion NeuroCare Training coordinator for additional information on classes at your facility.
