The Ongoing Trends & Challenges of High Frequency Oscillatory Ventilation:

A Symposium & Interactive Workshop

Wednesday, September 22, 2010

Carolinas Medical Center-NorthEast
Hamrick Theatre

8:00 a.m. until 4:00 p.m.

At the conclusion of this learning activity, the participant will be able to:

- *Develop a comprehensive understanding of the physiologic principles, early intervention, clinical application, benefits, and underlying risks of oscillatory ventilation support for respiratory failure*
- *Enhance the knowledge, skills and understanding in the use of oscillatory ventilation equipment following participation in interactive workshops*
- *Provide a forum to stimulate the possible implementation of critical care protocols in the management of ventilatory care to improve patient outcomes*
